For all current fans of Myah OS and all those soon to be, we give you Myah OS 3.0 Dragon. Dragon is the code name for Myah OS built around the KDE 3 desktop. We chose KDE 3.5.9 since it's still considered the most stable and best supported version of KDE.

As with all other versions of Myah OS, Dragon has full multimedia support and a wide range of software. There is a complete KDE desktop as well as Koffice, Ktorrent, Amarok and many more KDE base software. Dragon brings the best of KDE and the best of Myah OS together in the same system.

There has been several updates since the release of Box. The backup LXDE desktop now uses Metacity instead of Openbox as the window manager. Firefox has been updated to 3.0. Fusesmb was added for those who want to mount there Samba shares through fuse.

Again I would like to say thanks to those who have used our forum. We are proud to offer fast and useful support. No one is ignored and we strive to give the best answer we can. So don't be shy, if you have any questions at all, the Myah OS forum is the place for them.

Thanks you.

Jeremiah Cheatham
